Bow-front

Stern-back

Starboard - right side facing the front

Port - left side facing the front Denoted with a red light at night.

Leeward - In the direction that the wind is blowing towards.

Nautical mile - A distance of 1.852 kilometres (1.151 mi). Approximately the distance of one minute of arc of latitude on the Earth's surface. A speed of one nautical mile per hour is called a *knot* (*qv*).

Sextant - Navigational instrument used to measure a ship's latitude and longitude.

Shift tides - Sighting the positions of the sun and moon using a sextant and using a nautical almanac to determine the location and phase of the moon and calculating the relative effect of the tides on the navigation of the ship,
